TARIFF FOR WATER PROCESSED FOR SALE

Under existing Water Tariff Regulations, PUB customers such as breweries, distilleries and manufacturers of soft drinks, ice, sauce, vinegar or syrup are classified under a separate tariff category of Water Processed for Sale, and charged \$1.95 per cubic metre of water used. Other firms are classified as Non-Domestic customers, and pay \$1.10 per cubic metre.

The Singapore Federation of Chambers of Commerce & Industry pointed out to MTI that this is an anomaly, as most of the water sold to such customers is not actually resold, but is used for purposes no different from other firms. PUB has reviewed the matter, and will delete the Water Processed for Sale tariff category with effect from 1 July 1990. These customers will be reclassified under the Non-Domestic tariff category, and charged the Non-Domestic rate of \$1.10 per cubic metre from the August cycle of meter readings.
